Fast facts for why you should choose the IQ Air Health Pro Plus

- The IQAir HealthPro Plus is the premier unit for allergy/asthma sufferers that removes mold spores, pollen, bacteria, viruses and light smoke plus offers filtration to control odors.
- The "Plus" in the IQAir HealthPro Plus name means it removes odors, whereas the Regular and Compact models do not.
- Germany's consumer foundation rated the IQAir HealthPro Plus the most effective air cleaner for allergy sufferers.
- IQ Air is so effective it was the only air cleaner used to help control the SARS epidemic in Hong Kong!
- The Health Pro Plus air cleaners are used in hospital surgical suites, cancer and burn wards, and respiratory departments to help patients breathe germ free clean air!
- The Health Pro Plus is much more effective than Ionic Air Cleaners. Ionic Air Cleaners usually do not have fans therefore cannot filter all the room air efficiently!
- The HealthPro Plus features the most efficient pre-filter of any household air purifier, allowing the superior HEPA filter to last up to 5 times longer than similar filters in ordinary air purifiers.
  - Superior Air, Superior Health with IQ Air Purifiers  
In a 13' x 13' room, at a fan speed of 4, the Health Pro Plus will filter *all* of the air in the room 5 times in only 1 hour! Without turnover of *all of the air in the room* (such as ionic air cleaners), dust and harmful particles are not significantly reduced, will reaccumulate, and make breathing difficult.
- To help eliminate gaseous pollutants and odors, the IQAir HealthPro Plus offers revolutionary V5-Cell gas filtration technology. This filter offers excellent reduction of cooking odors and low concentrations of volatile organic compounds (VOCs) from carpets, vinyl flooring, building materials, and cleaning agents, among others.
- The HealthPro Plus is especially recommended to asthma sufferers, since their respiratory systems are often sensitized to gaseous irritants, as well as to allergens.

## **Applications**

Mold spore	Bacteria
Viruses	Pet dander (cat, dog, bird, etc) and hair
House dust and mites	Pollen
General indoor air pollution	Allergy particles
Light tobacco smoke	Light odors

## **Technical Advantages of HealthPro HEPA Filters**

The HealthPro units have one of the world's most efficient HEPA air filters. These units incorporate H12/13 class certified HyperHEPA filters which are normally used in multi-million dollar cleanrooms (eg, surgical suites, research labs, computer chip production facilities). The HEPA filters are certified by the world's most stringent HEPA filter test, the European Norm EN 1822. This HEPA filter certification makes HealthPro units able to capture up to 100 times more particles than conventional HEPA air cleaners. In fact, while other air cleaners (HEPA and ionic) are self-rated only for particles down to 0.3 microns in size, IQAir systems are independently rated to remove particles down to 0.01 microns with close to 99% efficiency.

**The IQAir HealthPro Plus comes complete with filters, user manual, hand signed Certificate of Performance, set of 4 casters, 10 foot power cord, user guide video (both VHS and DVD) and remote control with batteries.**

## IQAir HealthPro Plus Specifications

## Other Information

1. User Control Panel (comes with remote control unit)
2. Carrying Handle
3. No-Draft Diffuser
4. Cleanroom-Grade HyperHEPA Filter
5. Advanced Gas and Odor Control Filter
6. Snap-Open Locking Arms
7. High-Performance Centrifugal Fan
8. Advanced Fan Control
9. Pre-Max Pre-Filter (Class F9)
10. Dual Floor Air Intake

[IQAir HealthPro Plus Technical Specifications](#)

The IQAir HealthPro Plus is the world's most advanced air cleaner available for homes and offices. In fact, these IQAir systems are the only residential air cleaners to use superior HyperHEPA technology that is used in today's modern million-dollar cleanrooms and hospitals. As a result, these air cleaners remove more pollution particles, such as allergens and dust, from the air than conventional air cleaners. Germany's consumer foundation rated the IQAir

**IQAir HealthPro Plus - General**

Number of Selectable Fan Speeds	6
Air Delivery (with new filters installed) per Speed	1 - 30 cfm 2 - 60 cfm 3 - 90 cfm 4 - 120 cfm 5 - 140 cfm 6 - 260 cfm
Recommended Coverage Area	900 sq ft (based on maximum fan speed and an 8.5 ft ceiling)
System Efficiency for Particles	99.97% or more at 0.3 microns 99 for smaller particles
Power Requirements	115 VAC 50-60 Hz The entire electrical system is UL certified.
Energy Consumption (Max)	1 - 85 W 2 - 120 W 3 - 150 W 4 - 170 W 5 - 205 W 6 - 215 W
Dimensions	H 28" W 15" D 16"
Net Weight (including filters)	35 lbs
Warranty Period	5 yr on unit including fan motor, excluding filters

HealthPro Plus the most effective air cleaner for allergy sufferers.

### **IQAir HealthPro Plus - Filters**

Filter Configuration	1 Pre-Filter 1 V5-Cell Gas and Odor Filter 1 Cleanroom grade HyperHEPA filter
Pre-Filter	ASHRAE 85% high accumulation media, 55% efficiency at 0.3 microns, 25 sq ft area
V5-Cell Gas Phase Filter	5 lbs of activated carbon and alumina impregnated with potassium permanganate
HyperHEPA Filter	99.97% DOP (0.3 microns) media, mini-pleat with solvent-free separators, 40 sq ft area, patented expanded polystyrene (EPS), CFC-free construction
<b>Average Filter Life</b>	Pre-Filter: 6-18 months V5-Cell Filter: 1-2 yrs HyperHEPA Filter: 2-4 yrs

### **IQAir HealthPro Plus - Housing**

Housing Material	ABS(UV-stabilized), non-offgassing, high-impact resistant
Color of Main Housing/Arms	Light Gray/White
Air Intake	Two side openings at base of unit
Air Outlet	Via diffuser with horizontal 320 degree, 77 sq inch opening on top of unit

<b>IQAir HealthPro Plus - Fan</b>	
Fan Motor	700 cfm, 2950 rpm centrifugal, backward curved, maintenance-free steel ball bearings, UL/CSA registered
<b>IQAir HealthPro Plus - Electronic Control Panel</b>	
Control Panel Finish	Polyester overlay panel
Main Display	Liquid crystal display, 16 character x 2 line
Status and Indicator LEDs	Timer Status LED, Filter Life Status LEDs, Fan Speed Indicator LEDs
Display Languages	English, French, German, Italian, Spanish

### [More Reasons to Choose IQAir HealthPro Plus](#)

- Ultra-Quiet Design:**  
 With its large fan motor, the IQAir HealthPro Plus produces more clean air with less noise than conventional air purifiers. Unlike most air purifiers, which have the fan motor located after all filter stages, the IQAir HealthPro Plus has the fan in the center, in-between its noise absorbing filters. The IQAir HealthPro Plus also features a unique double-walled housing design to reduce sound transmission. Eight shock absorbers, which hold the fan, ensure that vibration is not transmitted to the housing. The results are impressive. The IQAir HealthPro Plus is suitable for even the most noise sensitive environments and is virtually inaudible at the lowest fan speed setting.
- No Air Drafts:**  
 The HealthPro Plus is designed to avoid air drafts. It evenly disperses the clean air through a large 320° vented diffuser, so you will always feel comfortable.
- Low Energy Consumption:**  
 Even though it's extremely powerful, the HealthPro Plus is also energy efficient.

Using one of the most efficient fans in the industry ensures that your HealthPro Plus costs only pennies per day to use.

### [More Reasons to Choose IQAir HealthPro Plus](#)

- **Advanced Gas and Odor Removal:**  
The IQAir HealthPro Plus features the V5-Cell Filter (patent pending) - the most advanced gas and odor filter available in a residential room air purifier. Featuring five filtration chambers with a unique blend of activated carbon and impregnated active alumina, it absorbs over 200 gaseous pollutants and odors, especially volatile organic compounds (VOC's).
- **EN 1822 Tested & Certified:**  
Released in the year 2000, EN 1822 is the world's most advanced and stringent air filter standard for HEPA filters. IQAir's HyperHEPA filter elements are currently the world's first filters in an air cleaner to have been type-tested inside the IQAir housing by an independent filter testing laboratory (Filtech Laboratories, Switzerland). Many hospitals and high-tech manufacturers, such as Intel, already require their filter suppliers to supply them with EN 1822 certification.
- **Certified Performance:**  
In an industry where most air purifiers don't actually meet their manufacturers' claims, IQAir tests and certifies each and every HealthPro Plus. Each HealthPro is tested for particle filtration efficiency, filter leakage, and air delivery. Each HealthPro Plus comes with its very own two-page Certificate of Performance, detailing the test results for that very machine.
- **Advanced Electronic Control Panel:**
- **Intelligent Filter Life Monitor:** Ordinary air purifiers make you guess when to replace filters, or use a preset timer. The HealthPro Plus intelligent filter life monitor takes actual use, speed settings, and air quality conditions into account. This ensures maximum filter yield and performance. LED's also alert you when it's time to replace filters.
- **Six Fan Speed Settings:** Most air purifiers provide only two or three fan settings. You have to run the unit either on a quiet but ineffective fan speed, or choose a more powerful, but noisy speed. The HealthPro Plus gives you the choice of up to six fan speeds, allowing you to select the ideal performance-to-sound ratio.
- **Integrated Timer:** Program the HealthPro Plus to run automatically based on your lifestyle. Set the unit to run during office hours, or program it in your bedroom to go on after you have reached deep slumber.
- **Remote Control:** Remotely turn the unit on and off, select the fan speed, and activate the timer from as far as 30 feet away.

## Filter Replacement (average use):

### HEPA Filter

Replace every 2-4 yrs

### V5-Cell Gas/Odor Filter

Replace every 1-2 years

### Pre-Filter

Replace every 6-18 months

## Top 7 Reasons Why Everyone Loves IQAir!

### 1. HyperHEPA™ - The Most Powerful Air Filtration Available.

Most air purifiers can only filter down to 0.3 microns in size – but 90% of all particles in the air are smaller than 0.3 microns! IQAir's patented HyperHEPA™ filtration filters down to 0.003 microns with a guaranteed minimum efficiency of 99%. This means that HyperHEPA™ can remove up to 100 times more allergens than conventional air cleaners.

## 2. Rated #1 by Top Reviewers

Since the HealthPro Plus was launched, it has received more #1 product reviews than any other air purifier on the market.

## 4. Trusted by Hospitals Worldwide

IQAir is the #1 air purifier used by hospitals worldwide. IQAir was recently selected by the Hong Kong Hospital Authority as the only room air cleaner powerful enough to be used in the fight against SARS. Now you can have the same medical grade air purifier for your home!

## 6. Advanced Gas & Odor Control

Protect yourself from household chemicals. Common household products like cleaners and detergents can emit dangerous vapors (volatile organic compounds, VOCs). Some air purifiers filter particles, but not chemicals or gases. IQAir offers the best gas filtration technology to remove the widest range of airborne chemicals.

## 3. Chosen by the American Lung Association

IQAir was selected by the American Lung Association as their exclusive partner for indoor air quality. Every IQAir product comes with educational materials to help you improve your indoor air.

## 5. #1 for Allergies & Asthma

IQAir is the only air cleaner clinically proven effective for allergic asthma. IQAir passed the most comprehensive double-blind, placebo controlled clinical trial. The HealthPro Plus is the top recommended air purifier by medical and healthcare professionals.

## 7. 100% Ozone-Free Technology

All IQAir air purifiers are certified to produce absolutely no ozone. Ozone is a lung irritant that is emitted from ionic air cleaners. Even small amounts of ozone are undesirable for allergy and asthma sufferers.
