

Dr Robbins,

I cannot express enough how grateful I am to you and your staff so I wanted to share my experience. Just a few years ago, my teeth were dominated by ugly mercury fillings, and at the time I found you, I was experiencing subtle but consistent symptoms such as irritability, anxiety, headaches, low mental stamina, difficulty with focus, and a terrible metallic taste in the morning. You removed the fillings over the course of several months, and I took the detox supplements as you recommended. Well after a year of being mercury free, not only do my teeth look natural, but ALL the dreadful symptoms are gone and I feel absolutely superb! Coming to your office was clearly one of the best decisions I ever made.

Many thanks,

Stephan
